

# User Story Splitting

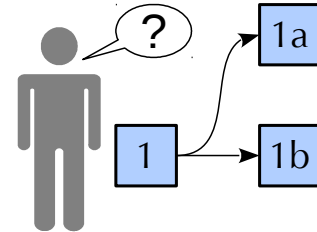

Process Step

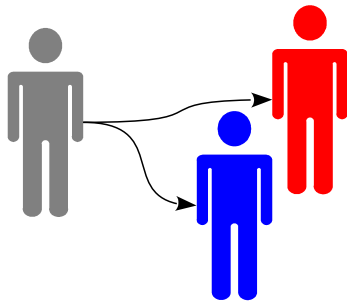

Entry Method

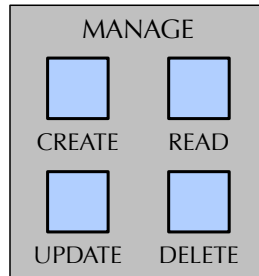

User Options

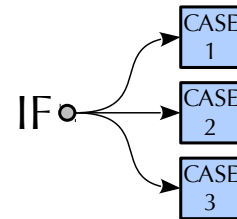

Role/Persona

CRUD

Rules/Errors

Entry Method

As a **Job Seeker**  
I can **upload my resume**  
so that **I get a job**

As a **Job Seeker**  
I can **copy and paste my resume into a text field...**

As a **Job Seeker**  
I can **select a resume on my local hard drive to upload...**

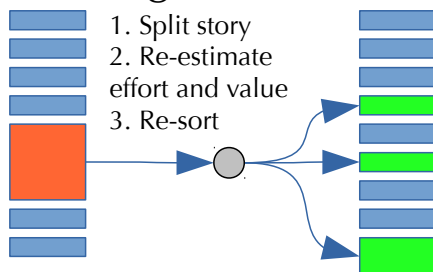

Role/Persona

As a **Job Seeker**  
I can **post my resume for review...**

As a **Site Editor**  
I can **approve an unreviewed resume...**

Backlog Refinement

1. Split story
2. Re-estimate effort and value
3. Re-sort

Additional Tips

- Don't split by architectural layer or component!!!
- Resulting stories must replace the original story (functionality must "add up" to the original)
- Don't split smaller than needed to fit in a Sprint
